* These vehicles have a “BOSE® Premium” amp that only accepts 2 channel audio inputs. OnStar® volume can be controlled via steering wheel mounted volume controls. You have the option of using AKG-CHM when utilizing the BOSE® amplifier. If you bypass the BOSE® amps then the AKG-OS1A and AKG-CHM interfaces are required.

† AKG-CDM is compatible with GM’s “Standard BOSE®” If OnStar® retention is not required or “Premium BOSE®” then AKLOC40 can be used.

‡ Enables aftermarket amplifier installation in fixed line level, data controlled GM premium audio systems (Premium BOSE®). Provides a data-bus generated remote amplifier turn-on output options are selectable.

• Only if vehicle is equipped with “Premium BOSE®”. If not then AKLOC40 can be used
